**How to Use this “Semester-by-Semester Degree Plan”:** Courses in this semester-by-semester breakdown are listed with several thoughts in mind. Prerequisites are listed first. Science, math, and major coursework are listed in order the course should be taken and in what term the course should be taken. Students should enroll into ORI 1111 and ENGL 1113, and any development courses in the first term. Courses listed in parenthesis are selections from which a student may choose. Enrollment into developmental courses will add to the total credit hour count, and may alter math and science enrollment rotations. -- While this is a guide to help the student with pre-enrollment, a study of the Course Schedule and a visit with an academic advisor is a must.

**Estimated Program Cost:** Students can complete this degree in five semesters. The estimated cost of this program is approximated at \$24,000.00.

Students should consult the Nursing Department for a breakdown of tuition, fees, textbook charges, exam fees, uniforms, travel, supplies, and other expenses ..... Actual program cost will vary from this estimate.
